

## **Banner Patents**

### *A flow of patented solutions*

Uncompromising quality assurance and the latest patented technologies are the reason why Banner currently supplies leading automotive manufacturers with starter batteries. The decisive maxims relating to innovation and quality consciousness are behind every Banner battery.

#### **Patents for success:**

- **AccuSafe** - patented leak protection provides absolute security.
- **Double Top cover** - 100% leak-proof, passes the rollover test, provides improved backfire and ESD\* protection.
- **Screws and Magic Eye** - provides simple and unambiguous information concerning current battery status for user certainty.
- **AGM\*\* valve stoppers** - guarantee extremely high levels of operational safety as the safety valve only opens in the case of extreme overloading (on water and oxygen are emitted).

\* ESD = electrostatic discharge.

\*\* AGM = absorbent glass mat. Battery acid is absorbed in the glass fibres and thus binds it in.
